

# International Journal of Diabetes in Developing Countries

Incorporating Diabetes Bulletin

[Editorial board](#)

[Aims & scope](#)

*International Journal of Diabetes in Developing Countries* is a peer-reviewed journal with a global reach and championed and edited by experts in the field. The journal focuses on the complete spectrum of contemporary clinical and basic sciences as applied to the clinical context, new and emerging technologies, cutting-edge innovations, and future trends in the field of diabetes. The articles are submitted under various categories/classifications like prevalence, epidemiology, etiopathogenesis, genetic and molecular biology, clinical and psychosocial aspects, complications, emergencies, treatment, management, pharmacoconomics, quality of life, technology, and community medicine. It publishes work done in the developing world, especially from countries affected by the epidemic of diabetes, mainly India, Bangladesh, Pakistan, West Africa, Iran, Turkey. The journal also receives submissions from Japan, Brazil, Nepal, Sri Lanka, and China. The journal publishes original articles, review articles (only systematic reviews and meta-analysis), editorials, letters to the editor, short articles, case reports, , consensus/guidelines, and position statements. — [show all](#)
